New Shores

a game for democracy

Instructions

Imagine that...

...you live on a mysterious island covered with a beautiful forest full of green trees and tasty berries. Soon you discover also that the ground is rich with coal deposits.

You and other inhabitants of *New Shores* will try to organize your life in a way that suits you and other members of the community. To do so you can use the island's natural resources, such as wood, coal and berries. They will bring you money needed for private and public investments.

With money you can raise your standard of living by investing in e.g. a private library or a swimming pool with jacuzzi. You may also contribute to public buildings, which add to the community statistics, such as education, health and culture.

It's up to you to decide on your priorities. Bear in mind, however, that your actions always entail consequences. Excessive use of the island's resources may increase the possibility of climate disasters...

Good luck!

Choose building

Savings: 29

A list of private buildings available.

Each player starts a game with one basic house. You cannot build another one unless it is destroyed.

TV room

: 1
Cost: 15

Every building displays information about its cost and points connected to the standard of living.

Gaming room with console

: 1
Cost: 15

Grey means that construction of a selected building exceeds your funds.

Investing in private buildings, you can increase to some extent the number of action points (available only to you).

Choose building

Savings: 37

A list of public buildings you can initiate.

Every building displays information about minimum contribution and the amount of points it adds to the island's statistics.

Investing in public buildings, you raise the level of education, health or culture on the island, and increase the number of action points (available to all).

Primary school
: 1
Min. contribution: 15
Full cost: 75

High school
: 2
Min. contribution: 25
Full cost: 125
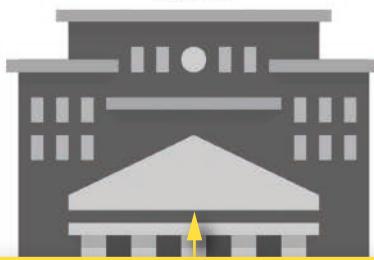

You don't have enough money to initiate the construction of this building.

University
: 4
Min. contribution: 40
Full cost: 200

Health center
: 1
Min. contribution: 25
Full cost: 125

Each player can contribute to a public building that is under construction.

Action cost & profits (summary)

costs   profits   * depending on a building

	costs	profits
Cutting trees	1	2, 4 or 6
Extracting coal	2	45
Collecting berries	1	0.2, 0.4 or 0.6
Planting trees	2	The green island
Building (private)	1 / X *	X *
Destroying private buildings	1	50% of building cost
Building (public)	1 / X*	You will raise the statistics on island (education, health, culture)
Protect buildings	1 / X *	You will protect a building against a natural disaster
Monitoring	1	You will learn what actions other (randomly selected) player performed in the current round
Sanctions	50% of action points that you take away from a player	You will decrease the number of action points available to a selected player in the next round
Transfers	—	You will help the player who needs financial support

Thresholds (summary)

During the game you may achieve different levels of:

action points:

- **0 - 3**   your scope of activity and social influence are very low
- **4 - 8**   you're quite influential - you may perform a lot of actions
- **9 - 13**   you're mighty - nothing can stop you

standard of living:

- **0 - 4**   low
- **5 - 8**   medium
- **> 8**   high

island's education, health or culture:

- **0 - 4**   low
- **5 - 8**   medium
- **> 8**   high
